TELETYPE UNIT ☐

UNRECORDED COPY FILED IN

Morrow 5714

None of the typewriting on items submitted in this case has been identified with typewriting submitted in the Hearnap or Symbionese Liberation Army cases.

The typewriting on the address labels submitted in this case is too limited to definitely classify but closely resembles standards for the typewriter mentioned in the attached report. This determination was made through an exhaustive search of the Typewriter Standards File and in consultation with other government agencies.

For your assistance, it has been noted that the typewriting on the city and state portions of the addresses on the address labels on many of the envelopes submitted in this case is much heavier and is out of register with the name portions of the addresses on the envelopes, indicating that the name portion of the address was typed on each label by a separate typewriting operation than the city and state portions of the addresses. Although the significance of this is unknown at this time, the information is being furnished for your assistance.

- Q49 Envelope bearing typewritten address label "Senator Frank Church, Boise, Idaho"

Q50 Copy of one page typewritten letter beginning "YOU SHOULD ALSO DEMONSTRATE ..."

Also Submitted: Fingerprint cards of [] and []

b6
b7C

Result of examination:

Q32, Q34, Q38, Q40, Q42, Q46, Q48, Q50 and the copy from which photograph Qc36 was made, are copies made from the same original utilizing what appears to be a mimeograph type process.

The typewriting on Q31, Q33, Q37, Q39, Q41, Q43, Q45, Q47, Q49 and the original from which Qc35 was made, is on pressure sensitive adhesive backed labels attached to the envelopes.

The conclusion was reached that the typewriter or typewriters used to prepare the typewriting on the envelopes submitted in this case were not used to prepare the typewriting on the master from which the copies of letters submitted in this case was prepared.

The typewriting on the address labels submitted in this case most closely resembles Laboratory standards for a Ransmayer pica type style, spaced ten characters per horizontal inch, and used on Royal Executive electric typewriters. The typewriting on the copies of letters submitted, which is elite type, spaced twelve characters per horizontal inch, is too limited and too indistinct to permit classification as to make.

Each sheet of paper, Q32, Q34, Q38, Q40, Q42, Q44, Q46, Q48 and Q50 bears the watermark "PARSONS EDMONT BOND 50% COTTON FIBER" which is registered to the NVF Company, Post Office Drawer 311, Wilmington, Delaware. The submitted envelopes contain no watermarks. The submitted items contain no indented writing of significance or other characteristics to aid in definitely determining their source. An eight cent U.S. Postal Service stamp is affixed to each of the submitted envelopes. These stamps were torn from a roll or rolls of stamps.

The submitted items are being returned separately to the contributing offices. Photographs were made.
